

Ian Norris

Data Scientist

📍 Flagstaff, AZ | ✉ ian52n@gmail.com | [in ian-norris1](https://www.linkedin.com/in/ian-norris1) | [G ian52n](https://github.com/ian52n) | [🌐 ian.ai-editor.app](https://ian.ai-editor.app)

Summary

M.S. Mathematics (With Distinction, GPA 4.0) with research and production experience across machine learning, statistical modeling, and large language models. Led a 5-person team that built an LLM evaluation system lifting accuracy from 50% to 96%, with a published research paper and hands-on work across the modeling, evaluation, and deployment lifecycle. Strong Python and statistical foundations.

Technical Skills

Languages: Python, SQL, C++, Julia, TypeScript, C#

ML & Stats: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, JAX, statistical modeling, time series, feature engineering

AI & LLMs: LLM evaluation, prompt engineering, RAG, Claude API, OpenAI API, NLP

Data & HPC: PostgreSQL, schema design, data pipelines, ETL, HPC, parallel computing, numerical analysis

Tooling: Git, Docker, AWS, Linux, Jupyter, CI/CD

Education & Research

M.S. Mathematics, With Distinction — GPA 4.0

2026

Northern Arizona University

Flagstaff, AZ

- Led a 5-person team designing an LLM evaluation system; improved measured model accuracy from 50% to 96%.
- ML-based influenza forecasting on multi-source time-series data; feature engineering, model selection, statistical validation.
- Validated-numerics research on the Lorenz system (C++/Julia) on an HPC cluster. Graduate Teaching Assistant (2024–2026); DataFest mentor.

B.S. Mathematics — GPA 3.8

2011

Northern Arizona University

Flagstaff, AZ

Published: “Biased weak polyform achievement games,” *Discrete Mathematics and Theoretical Computer Science*, 2014.

Experience

Full-Stack Engineer

2025

AssetMark (Financial Services)

Concord, CA

- Designed PostgreSQL schemas and wrote SQL queries for analysis and reporting on a platform serving 10,000+ users; collected, cleaned, and validated data with a focus on accuracy and consistency.

Lead AI Engineer & Founder

2025 – Present

AI Editor LLC

Remote

- Founded the company and shipped a production AI-powered application built on LLM APIs; tuned prompt engineering, output validation, and consistency checks for reliable generative behavior.

Software Engineer

2025

Practice Defenders (Electronic Health Records)

Remote

- Built Python pipelines to acquire, clean, and validate data from multiple external sources; produced consistent, well-documented datasets for downstream use.

Mathematics Educator (Teacher & Founder)

2012 – 2024

Palm Harbor University HS; Prime Factor Tutoring Services

Palm Harbor, FL

- Taught mathematics and special education and ran an independent tutoring business; communicated complex quantitative findings clearly to non-technical audiences.

Selected Projects

SAIR Math Distillation Challenge

2026

Python, LLM eval

github.com/ian52n/sair-competition

- Entry in Terence Tao’s mathematics distillation challenge; engineered a 1 KB instruction sheet exploiting structural priors, iterated against a 300-problem benchmark.

Certified Sign Sequences — Lorenz System

2025

Julia, validated numerics

github.com/ian52n/certified-sign-sequence

- Rigorously certified L/R sign sequences via Taylor-model validated reachability and interval-arithmetic directionality proofs.
