

Ian Norris

Full-Stack Engineer

📍 Flagstaff, AZ | ✉ ian52n@gmail.com | [in ian-norris1](https://www.linkedin.com/in/ian-norris1) | [G ian52n](https://github.com/ian52n) | [🌐 ian.ai-editor.app](https://ian.ai-editor.app)

Summary

Full-stack engineer with production experience across React/TypeScript, .NET Core (C#), Python, and PostgreSQL on a platform serving 10,000+ users. Recent work includes a deployed iframe + postMessage SPA bridge between legacy ASP.NET and modern .NET Core/React apps, and an AI-powered product shipped end-to-end as a solo founder. Strong on architecture, REST API design, and shipping clean, tested code.

Technical Skills

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui

Backend: .NET Core (C#), ASP.NET MVC, Entity Framework, Python, Node.js, Go, REST APIs

Data & Cloud: PostgreSQL, SQL, Kafka, AWS, Cloudflare Workers, Linux, Docker, CI/CD

Practices: Unit & UI testing, RBAC/auth, Git, GitHub Actions, Agile/Scrum, Clean Architecture

Experience

Full-Stack Engineer

2025

AssetMark (Financial Services)

Concord, CA

- Built end-to-end features across React/TypeScript, .NET Core (C#) with Entity Framework, and PostgreSQL for a platform serving 10,000+ users, at 85% unit-test coverage.
- Architected and deployed a legacy-integration layer (iframe + postMessage) bridging server-side ASP.NET with new .NET Core/React apps inside a single-page app.
- Designed a scalable RBAC permission schema; built REST APIs; used Kafka for inter-service event streaming. Backends designed for Linux production deployment.

Lead Engineer & Founder

2025 – Present

AI Editor LLC

Remote

- Founded the company and shipped a production AI-powered iOS app end-to-end as sole engineer (800+ users, zero crash rate); also building a peer-to-peer VPN with a native Android (Kotlin) client and Go backend.

Software Engineer

2025

Practice Defenders (Electronic Health Records)

Remote

- Built Python API integrations and automation pipelines across external EHR systems, focused on reliability and consistent data handling across distributed services.

Software Developer (Volunteer)

2023 – 2024

AESOP Afghanistan

Remote

Built Python backend services and API-driven workflows (Google APIs); refactored legacy systems and added automated testing.

Mathematics Educator (Teacher & Founder)

2012 – 2024

Palm Harbor University HS; Prime Factor Tutoring Services

Palm Harbor, FL

- Taught mathematics and special education; communicated complex technical concepts clearly to diverse audiences.
- Built and ran an independent tutoring business for eight years; full ownership of acquisition, delivery, and retention.

Selected Projects

User Group Management System

2025

C#/.NET 8, React, PostgreSQL

- Full-stack RBAC admin tool: RESTful .NET 8 backend, React/TypeScript frontend, PostgreSQL, clean architecture; end-to-end CRUD over groups, permissions, and attributes.

Education

M.S. Mathematics, With Distinction — GPA 4.0

2026

Northern Arizona University

Flagstaff, AZ

Led a 5-person team designing an LLM evaluation system; improved model accuracy 50%→96%. Graduate Teaching Assistant (2024–2026); DataFest mentor.

B.S. Mathematics — GPA 3.8

2011

Northern Arizona University

Flagstaff, AZ

Published: “Biased weak polyform achievement games,” *Discrete Mathematics and Theoretical Computer Science*, 2014.
