

Ian Norris

iOS Engineer

📍 Flagstaff, AZ | ✉ ian52n@gmail.com | [in ian-norris1](https://www.linkedin.com/in/ian-norris1) | [G ian52n](https://github.com/ian52n) | [🌐 ian.ai-editor.app](https://ian.ai-editor.app)

Summary

iOS engineer who ships. Sole engineer behind a generative-AI photo editor published to the App Store (800+ users, zero crash rate), with a broad full-stack and quantitative background (M.S. Mathematics, 4.0). Strong across Swift, SwiftUI, REST integration, performance profiling, and the full App Store lifecycle.

Technical Skills

iOS & Apple: Swift, SwiftUI, UIKit, Swift Concurrency, Core Data, MapKit, Core Location, Xcode Instruments, App Store Connect

Languages: Swift, Python, TypeScript, C#, Kotlin, Go, SQL | **Cross-Platform:** React Native, Expo

Backend & Data: REST APIs, .NET Core, PostgreSQL, Node.js, Cloudflare Workers

Practices: Unit & UI testing, CI/CD, Git, Agile/Scrum, MVVM, Clean Architecture

Experience

Lead iOS Engineer & Founder

2025 – Present

AI Editor LLC

Remote

- Designed, built, and shipped **AI Photo Editing** (Swift/SwiftUI) to the App Store as sole engineer in under three months — 800+ users, zero crash rate, sub-6s cold start, ≤500 MB peak memory.
- Built offline-first architecture with on-device image processing and caching; integrated generative-AI features via the DeepAI API.
- Profiled and resolved performance bottlenecks with Xcode Instruments; maintained a full unit + UI test suite and an App Store CI/CD pipeline. Also building a peer-to-peer VPN (Kotlin Android client, Go backend).

Full-Stack Engineer

2025

AssetMark (Financial Services)

Concord, CA

- Built end-to-end features across React/TypeScript, .NET Core (C#) with Entity Framework, and PostgreSQL for a platform serving 10,000+ users, at 85% unit-test coverage.
- Designed a scalable RBAC permission schema and shipped a legacy-integration layer (iframe + postMessage) bridging ASP.NET and new .NET Core/React apps; used Kafka for inter-service event streaming.

Software Engineer

2025

Practice Defenders (Electronic Health Records)

Remote

- Built API integrations and automation pipelines across external EHR systems, focused on reliability and consistent data handling across distributed services.

Mathematics Educator (Teacher & Founder)

2012 – 2024

Palm Harbor University HS; Prime Factor Tutoring Services

Palm Harbor, FL

- Taught mathematics and special education; communicated complex technical concepts clearly to diverse audiences.
- Built and ran an independent tutoring business for eight years; full ownership of acquisition, delivery, and retention.

Selected Projects

Trace — AI Travel App for Runners

2026

Swift/SwiftUI & React Native (Expo)

github.com/ian52n/trace

- Built in two stacks from one product spec (native SwiftUI; React Native/Expo on iOS + Android); a "generate a local run" feature stitches real loops through nearby POIs via a Cloudflare Worker, with Claude writing each route up in an Atlas-Obscura voice.

Education

M.S. Mathematics, With Distinction — GPA 4.0

2026

Northern Arizona University

Flagstaff, AZ

Led a 5-person team designing an LLM evaluation system; improved model accuracy 50%→96%. Graduate Teaching Assistant (2024–2026); DataFest mentor.

B.S. Mathematics — GPA 3.8

2011

Northern Arizona University

Flagstaff, AZ

Published: “Biased weak polyform achievement games,” *Discrete Mathematics and Theoretical Computer Science*, 2014.
