EDUCATION & RESEARCH

M.S. Mathematics (GPA 4.0)

Northern Arizona University

📅 Expected May 2026 📍 Flagstaff, AZ

- Coursework: Deep Learning, Numerical Analysis, Optimization, Mathematical Statistics, Mathematical Computing, Dynamical Systems, Partial Differential Equations
- **LLM Evaluation System:** Led team of 5 to design and implement an evaluation framework for large language model outputs; improved measured model accuracy from 50% to 96%
- **ML-Based Influenza Forecasting:** Built predictive models on spatial-temporal epidemiological data; feature engineering, model selection, and statistical validation
- **Large-Scale Numerical Simulation:** Research on numerical simulation methods for dynamical systems, run on NAU's Monsoon HPC cluster
- DataFest competition mentor (2025, 2026)
- Graduate Teaching Assistantship (2024 – 2026)

B.S. Mathematics (GPA 3.8)

Northern Arizona University

📅 2011 📍 Flagstaff, AZ

- Undergraduate research in combinatorial game theory; results published in peer-reviewed journal

PUBLICATION

- **Norris, I.,** Sieben, N. *Biased weak polyform achievement games.* Discrete Mathematics and Theoretical Computer Science, 2014, Vol. 16 no. 3 (3), pp. 147–172. DOI: 10.46298/dmtcs.2098

EXPERIENCE

Lead AI Engineer (Founder)

AI Editor LLC

📅 2025 – Present 📍 Remote

- Designed and shipped a production iOS application (AI Photo Editor, Swift / SwiftUI) integrating the DeepAI API and on-device NLP / image processing into core editing workflows; 500+ users with zero crash rate
- Tuned prompt engineering, input validation, and consistency checks to keep generative output reliable at production scale

SUMMARY

Applied mathematician finishing an M.S. in Mathematics (GPA 4.0) with research and production experience across machine learning, statistical modeling, large language models, and HPC. Led a team of five to build an LLM evaluation system that lifted model accuracy from 50% to 96%, and shipped a production AI-powered application as sole engineer. Strong Python and mathematical foundations, with peer-reviewed research and hands-on experience across the modeling, evaluation, and deployment lifecycle.

PROGRAMMING

Python SQL C++ Julia
TypeScript JavaScript C#

ML & DATA SCIENCE

PyTorch TensorFlow Scikit-learn
NumPy Pandas JAX
Deep Learning Feature Engineering

AI & LLMs

LLM Integration LLM Evaluation
Prompt Engineering Claude APIs
OpenAI APIs DeepAI APIs NLP
Generative AI

HPC & NUMERICAL

HPC Parallel Computing
Numerical Simulation
Numerical Analysis Optimization

MATHEMATICAL FOUNDATION

Statistical Modeling
Time Series Modeling
Mathematical Statistics
Dynamical Systems PDEs
Real Analysis Linear Algebra

DATA ENGINEERING

Data Pipelines ETL
Data Validation Data Ingestion
Automation REST APIs

Full Stack Engineer

AssetMark

📅 2025 📍 Concord, CA

- Built data-backed features across React (TypeScript), .NET Core (C#), and PostgreSQL on a financial services platform serving 10,000+ users; designed schema, queries, and integration logic across the stack
- Backends designed for Linux production deployment; PostgreSQL run in WSL Ubuntu during development
- Achieved 85% unit test coverage; Agile / Scrum collaboration across cross-functional teams

Software Engineer

Practice Defenders

📅 2025 📍 Remote

- Built Python data pipelines and API integrations across external systems in the electronic health records (EHR) domain; data ingestion, transformation, and validation with consistent handling across distributed services

Software Developer (Volunteer)

AESOP Afghanistan

📅 2023 – 2024 📍 Remote

- Developed Python backend services and data-driven workflows leveraging Google APIs; refactored legacy systems and introduced automated testing using Python’s unittest framework

Mathematics & Special Education Teacher

Palm Harbor University HS; Valor College Preparatory HS

📅 2019 – 2024 📍 Palm Harbor, FL; Nashville, TN

- Communicated complex quantitative and technical concepts clearly to diverse audiences across multiple disciplines and stakeholder groups

Mathematics Tutor (Founder)

Prime Factor Tutoring Services

📅 2012 – 2020 📍 Palm Harbor, FL

- Built and ran independent client business for 8 years delivering personalized lessons; rigorous problem diagnosis and customer-focused delivery

DATABASES & CLOUD

PostgreSQL SQL Schema Design
AWS Linux Docker Git
