

Ian Norris

AI Engineer

📍 Flagstaff, AZ | ✉ ian52n@gmail.com | [in ian-norris1](https://www.linkedin.com/in/ian-norris1) | [G ian52n](https://github.com/ian52n) | [🌐 ian.ai-editor.app](https://ian.ai-editor.app)

Summary

Applied AI engineer who ships products on top of foundation models. Took a generative-AI iOS app to the App Store as sole engineer (800+ users, zero crash rate), integrating language and image models, porting image models to Metal for on-device inference, and designing for latency and failure. Led a 5-person team that built an LLM evaluation system, lifting measured accuracy from 50% to 96%. Strong production engineering with a quantitative foundation (M.S. Mathematics, GPA 4.0).

Technical Skills

AI & LLMs: Foundation-model APIs (Claude, OpenAI, DeepAI), LLM integration, prompt engineering, RAG, LLM evaluation, NL→SQL, NLP, output validation

On-Device & Edge ML: Metal, on-device inference, model porting & optimization, latency reduction, caching

ML & Data: Python, PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, feature engineering, time-series modeling, statistical validation

Serving & Infra: REST APIs, Node.js, .NET Core, PostgreSQL, Cloudflare Workers, Docker, AWS, CI/CD

Languages: Python, Swift, TypeScript, Go, C#, SQL, Julia, C++

Experience

Founder & AI Engineer

2025 – Present

AI Editor LLC

Remote

- Shipped **AI Photo Editing** to the App Store as sole engineer: integrated generative image-AI (DeepAI API) into the product UI with handling for latency, uncertainty, and failure states; 800+ users, zero crash rate.
- Ported image models to **Metal** for on-device inference and built offline-first caching to cut latency; profiled and optimized performance with Xcode Instruments and shipped via an App Store CI/CD pipeline.

Full-Stack Engineer

2025

AssetMark (Financial Services)

Concord, CA

- Built production features across React/TypeScript and .NET Core (C#) with PostgreSQL for a 10,000-user platform at 85% test coverage; designed REST APIs and relational data schemas.

Software Engineer

2023 – 2025

Practice Defenders (EHR) & *AESOP Afghanistan*

Remote

- Practice Defenders:** Built Python data pipelines to clean and validate data across external EHR systems.
- AESOP Afghanistan:** Built Python backend services and Google-API workflows; refactored and tested legacy systems.

Mathematics Educator (Teacher & Founder)

2012 – 2024

Palm Harbor University HS; Prime Factor Tutoring Services

Palm Harbor, FL

Taught and mentored for over a decade; built and ran an independent tutoring business for eight years.

Selected AI & ML Projects

LLM Evaluation System

2026

Python, LLM evaluation

Graduate research

- Led a 5-person team on benchmark design, automated scoring, and an iteration loop that lifted measured model accuracy from 50% to 96%.

Todo AI — Natural-Language Assistant

2025

Python, LLM, PostgreSQL

github.com/ian52n/todo-ai-model

- LLM-driven natural-language-to-SQL pipeline with separate query-processing and SQL-generation stages over PostgreSQL; containerized with Docker.

Education

M.S. Mathematics, With Distinction — GPA 4.0

2026

Northern Arizona University

Flagstaff, AZ

ML-based influenza forecasting (feature engineering, model selection, validation); coursework in Deep Learning and Optimization. Graduate Teaching Assistant; DataFest mentor.

B.S. Mathematics — GPA 3.8

2011

Northern Arizona University

Flagstaff, AZ

Peer-reviewed publication in *DMTCS* (combinatorial game theory), 2014.
