

Ian Norris

Data Scientist

📍 Flagstaff, AZ | ✉ ian52n@gmail.com | [in ian-norris1](https://www.linkedin.com/in/ian-norris1) | [G ian52n](https://github.com/ian52n) | [🌐 ian.ai-editor.app](https://ian.ai-editor.app)

Summary

M.S. Mathematics (With Distinction, GPA 4.0) with research and production experience across machine learning, statistical modeling, and large language models. Led 5-person team to build LLM evaluation system lifting accuracy from 50% to 96%. Published research paper. Hands-on work across modeling, evaluation, and deployment lifecycle.

Technical Skills

Languages: Python, SQL, C++, Julia, TypeScript, C#

ML & Stats: PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, JAX, statistical modeling, time series, feature engineering

AI & LLMs: LLM evaluation, prompt engineering, RAG, Claude API, OpenAI API, NLP

Data & HPC: PostgreSQL, schema design, data pipelines, ETL, HPC, parallel computing, numerical analysis

Tooling: Git, Docker, AWS, Linux, Jupyter, CI/CD

Education & Research

M.S. Mathematics, With Distinction — **GPA 4.0**

2026

Northern Arizona University

Flagstaff, AZ

- Led 5-person team to design LLM evaluation system; improved measured model accuracy from 50% to 96%.
- ML-based influenza forecasting on multi-source time-series data; feature engineering, model selection, statistical validation.
- Validated-numerics research on Lorenz system (C++/Julia) on HPC cluster.
- Graduate Teaching Assistant; Data Science Club Vice President, SAIR Team Leader, DataFest Mentor.

B.S. Mathematics — **GPA 3.8**

2011

Northern Arizona University

Flagstaff, AZ

Peer-reviewed publication in *DMTCS* (combinatorial game theory), 2014.

Experience

Full-Stack Engineer

2025

AssetMark (Financial Services)

Concord, CA

- Designed PostgreSQL schemas and wrote SQL queries for analysis and reporting on platform serving 10,000+ users. Collected, cleaned, and validated data with focus on accuracy and consistency.

Lead AI Engineer & Founder

2025 – Present

AI Editor LLC

Remote

- Founded company and shipped production AI-powered application built on LLM APIs; tuned prompt engineering, output validation, and consistency checks for reliable generative behavior.

Software Engineer

2023 – 2025

Practice Defenders (EHR) & *AESOP Afghanistan*

Remote

- **Practice Defenders:** Built Python pipelines to acquire, clean, and validate data from multiple external sources; produced consistent, well-documented datasets for downstream use.
- **AESOP Afghanistan:** Built Python backend services and API-driven data workflows (Google APIs); refactored legacy systems and added automated testing.

Mathematics Educator (Founder & Teacher)

2012 – 2024

Prime Factor Tutoring Services; Palm Harbor University HS

Palm Harbor, FL

Ran independent tutoring business; taught math and special education. Communicated complex quantitative findings clearly to non-technical audiences.

Projects

SAIR Math Distillation Challenge

2026

Python, LLM eval

github.com/ian52n/sair-competition

- Entry in Terence Tao's mathematics distillation challenge; engineered 1 KB instruction sheet exploiting structural priors; iterated against 11,500-problem benchmark.

Certified Sign Sequences — Lorenz System

2025

Julia, validated numerics

github.com/ian52n/certified-sign-sequence

- Rigorously certified L/R sign sequences via Taylor-model validated reachability and interval-arithmetic directionality proofs.
